

CYBER LIABILITY & DATA SECURITY

Technology is helping you scale your cleaning business to greater heights. With that growth comes increased responsibility and liability.

As a cleaning business owner you are responsible for the security for your client database, the access to payment information, and even the tracking capabilities of scheduling and messaging technology. The solution involves both proper insurance and proper training for your cleaning team.

Standard businessowners coverage or general liability coverage does not cover the broad cyber liability risk. Let the team at Moody Clean Insurance review your processes and your coverage to make sure you are both scaling through technology and protecting what you build.

When Cleaning Businesses Get Breached Your Insurance Should

Insure the first party costs for your data

- Data Restoration
- Business Interruption
- Cyber Extortion
- Computer Fraud

Insure the third party costs for liability of client/employee data

- Privacy Liability
- Legal Fees and Settlement Costs
- Customer Notifications Costs
- Client Credit Monitoring Costs
- Regulatory Fines and Penalties

Let's talk about your cleaning business!
